

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

*Notes on SELF-SUPPORTING DISPENSARIES, with some Statistics of the Coventry Provident Dispensary. Communicated by CHARLES H. BRACEBRIDGE, ESQ., Atherstone Hall, Warwickshire.*

[Read before Section (F,) Economic Science and Statistics, of the British Association for the Advancement of Science, at Leeds, the 28th September, 1858.]

IN offering the Statistics of the self-supporting Dispensary at Coventry to this Section, I do it as an example of those institutions projected by Mr. H. L. Smith, of Southam, Warwickshire, which when supported by a sufficient number of members, have been successful. The Statistics of that at Northampton are fully as favourable, though not carried over so long a period; this latter having been instituted in 1845, and the former in 1831.\* The Queen's visit to Warwick gave occasion to the formation of a Central Society for the promulgation of the principle, to whom application might be made for information as to rules, books, and other details, by the possession of which the founders might proceed safely, and without danger of failing in their objects, provided always the one necessity of all insurance against risks, sufficient numbers, be supplied. This little Society was founded at Warwick in July last (1858), the Lord Lieutenant, the High Sheriff, Lord Warwick, Lord Willoughby, and several magistrates and gentlemen of the county, as well as two or three gentlemen from Coventry and Northampton, being present, and vouching for the working of the Coventry and Northampton Dispensaries for more than twenty years. To this Society the following towns have already applied for information:—Bath, Bradford, Conway, Hereford, Southend, and Tadcaster. It is called the "Society for promoting the principles of Royal Victoria Self-supporting Dispensaries." Honorary Secretary—H. S. Smith, Esq., Southam; Bankers—Messrs. Greaves, Greenway, and Smith, Warwick; Committee meets at the Warwick Arms, at Warwick.

\* The following are the statistics for 1857 of the Dispensaries at Coventry and Northampton:—

Place.	Members.	Cases Attended.	Midwifery Cases.	Paid for Drugs.	Paid to Medical Men.	Paid by Free Fund.
Coventry (founded 1832)}	No. 4,500	No. 2,927	No. 48	£ 251	£ 491	£ 749
Northampton (founded 1845)}	5,429*	14,960	222	166	578	751

\* In 1851.

The advantages to members are, that the Dispensaries are founded on the principle of Provident Insurance. Practice is afforded to medical men, and emulation excited. Many cases, no doubt, are brought under their notice which would otherwise have been neglected, till too late for remedies to be applied ; to say nothing of the great facilities afforded by these institutions for obtaining statistics of disease, and of their tendency to promote sanitary improvements.

Clubs can be taken in *en masse*, and Cholera cases are attended gratis. The payments to medical men, when divided by the number of cases appear to be about 1*s.* at Northampton, but are considerably higher, about 3*s. 4d.*, at Coventry ; the other expenses are salaries to Dispenser and a boy, and the purchase of drugs, leeches, and instruments. The variation arises from calculating attendance on *every child* in one instance and not in the other. In each case the medical men have divided 750*l.*, [Coventry 1*l.* less, Northampton 1*l.* more,] and are satisfied. The number of visits made at patients' abodes in severe cases is not mentioned.

At Coventry each family selects its medical man for the year ; so that it becomes unnecessary to enter every slight case among the children for a proportional division among the medical men at the end of the year.
